ISSUES / ITEMS TO VERIFY*The macro should flag uncertainty rather than choose silently between conflicting public records*

Priority	Issue	Source(s)	Recommended Verification
HIGH	Property Tax Portal could not be verified automatically.	Property Tax Portal	Open the official source link on the Start/Sources sheet and verify manually. Error: Property Tax Portal did not return a PIN-specific results page for 16-30-204-020-0000.
HIGH	Assessor class and current CookViewer building class do not match.	Parcel Universe / CookViewer	Review both current sources; do not silently overwrite either classification.
HIGH	Tax-record municipality and spatial municipality differ.	CookViewer tax municipality / Cook County Municipality Boundary	Confirm the municipal boundary for zoning/incentive work. Cook County itself warns tax and spatial municipality concepts can disagree.
